

NETWORK

OUR VISION

We aim to build a global network of training facilities that can provide the wind industry in all relevant markets with the urgently needed professionals.

Our goal is to offer optimal training solutions at the highest methodological and didactical level.

OUR MISSION

We provide the wind industry with the best trained professionals for the production, installation, commissioning as well as service and maintenance of wind turbines. As a reliable partner of the industry, we thus make an important contribution to the energy revolution.

BZEE ASSOCIATION

The BZEE Association (BZEE e.V.) is a non-profit, industry-driven organization set up in 2000 to address the skills gap in the wind industry and initiate needed training activities.

Members representing major turbine manufacturers, utilities along with service and training providers cooperate on the development of skills to meet the qualification demands of wind energy stakeholders.

QUESTIONS & ANSWERS

WHY WAS BZEE ESTABLISHED?

BZEE was established to fill the skills gap facing the German wind industry more than 20 years ago. Today many countries worldwide are facing similar challenges, making BZEE more relevant than ever.

WHY BECOME A BZEE PARTNER?

By becoming a BZEE partner you will be in a position to fully train participants as entry level service technicians for the wind industry. Additionally, you will be able to offer training modules (e.g. GWO BST modules) to industry and increase turnover for your college or company.

ARE BZEE QUALIFICATIONS RECOGNIZED INTERNATIONALLY?

Yes, BZEE qualifications are widely recognized as best practice vocational education by many of the world's leading manufacturers of wind turbines. Additionally, BZEE qualifications more than satisfy the minimum requirements of GWO. In fact, the BZEE global network has trained more people to be wind turbine technicians than any other organization!

WHAT SERVICES CAN BZEE OFFER

BZEE can offer you a full-service package - from consulting on how to design and set up a training facility to instructor qualification courses and site certification.

BZEE

THE CLIENTS

WHAT OUR CLIENTS SAY

HOLLAND COLLEGE · CANADA

Without BZEE it would have taken us many years to develop a training facility and courses for wind turbine technicians. BZEE has the knowledge and expertise to put vocational colleges in a position to train students to a recognized standard for work in a sustainable and growing industry within a short period of time. This saved our college a lot of time, money and hard work.

ANDREW DIBLING,
LEARNING MANAGER
WIND TURBINE TECHNICIAN

MONSSON GROUP · ROMANIA

Why reinvent the wheel?
By becoming a BZEE licensed partner we were able to offer training modules recognized by the wind industry within months of signing an agreement and increase our turnover almost immediately!

ABOUT US

WHO WE ARE

BZEE is the pioneer of wind energy training with more than 20 years of experience on the market.

The BZEE network of licensed training providers is the only truly global training network with partners on 5 continents. The BZEE standard is the world's leading qualification standard for wind turbine technicians and is considered as the benchmark for training excellence in the industry.

The BZEE network offers comprehensive modular courses developed by the industry for the industry delivered in realistic training environments by experienced professionals. All BZEE training providers are certified and meet the strict BZEE training provider criteria. Additionally, training providers are audited on a regular basis to ensure they always comply with BZEE standards. BZEE training courses focus on practical training on real turbines, as favoured by the industry, setting them apart from the many classroom-based courses on the market.

Wind Turbine Technology

electrical engineering, mechanics, hydraulics,
rotor blade repair

Safety and Rescue

working at heights, fire protection, driver
safety training, environmental protection
and hazardous substances

Tailor-Made Seminars

BZEE has developed a range of technical
qualifications and professional seminars
tailored to the wind industry
