

Tenir pour vivre

CENTRE D'ÉTUDE ET DE PRATIQUE DE LA SURVIE

Traditionally, our focus was on maritime safety training.

However, by becoming a BZEE licensed partner in 2011, we were able to quickly develop our training courses to meet the wind industry requirements and supply the industry both in France and internationally with safety-conscious, well-trained technicians for the onshore and the offshore sectors.

BZEE was instrumental in this process, bringing us the Quality of Service needed by the industry.

We are happy to be part of the BZEE network and can recommend BZEE to anyone who wants to offer Quality training and service in this growing industry.

Yann Chauty, Président, CEPS, France
