Dear Warren,

I am reaching out to say thank you to the BZEE Network and their partners for helping Kalamazoo Valley Community College establish a leading Wind Turbine Technician training program in Kalamazoo MI over a decade ago.

The BZEE gave us the knowledge and training needed to develop our own training facility and courses for wind turbine technicians here in the United States in the year 2008. Without BZEE it would have been a slow and difficult process to acquire the skills needed to train students in this demanding career.

We have been delivering courses for over 10 years and have trained hundreds of skilled technicians, are a highly regarded training program, and even offer commercial training courses for the wind industry. Additionally, we now run train-the-trainer courses on behalf of BZEE for new clients from around the globe and can safely say becoming a member of the BZEE network has paid off for us.

If you have a client who is interested in setting up a wind industry training facility in a short period of time, and teach students to an internationally recognized standard, BZEE is the way to go.

Feel free to provide my contact information to a client interested in hearing more about the benefits and support the BZEE Network can provide for becoming a successful BZEE training provider.

Best Regards,

A handwritten signature in blue ink, appearing to read 'Tom Sutton', with a long horizontal flourish extending to the right.

Tom Sutton, Director  
Wind Energy and Technical Training Services
